# Welcome to **All IS<sup>+</sup>** EXPO

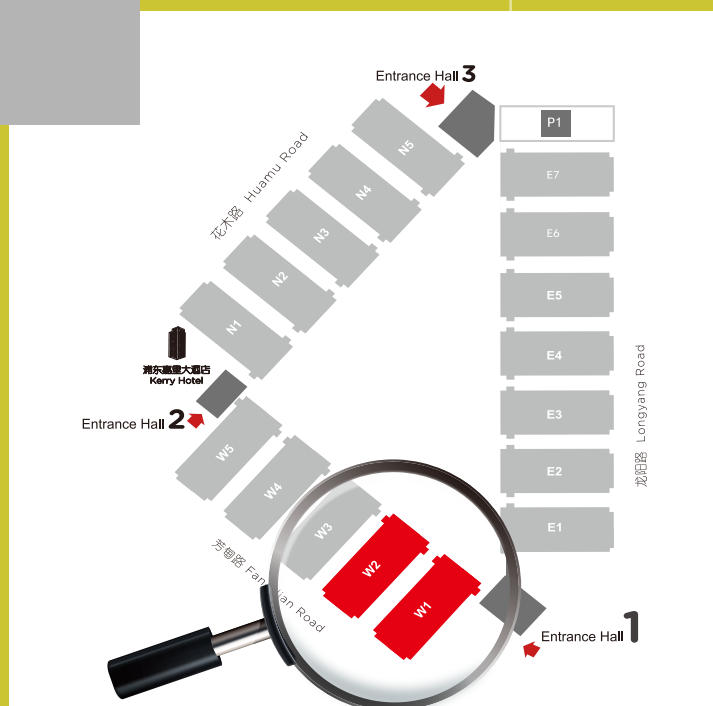

As enterprises apply an increasing number of intelligent equipment and control systems, realize equipment networking, and establish a smart factory system across the factory, the resulting information and data security hazards and risks are also increased rapidly when enterprises plan the smart dream factory. Meanwhile, it is necessary to take various hidden industrial safety hazards into full consideration, including the safety of electromechanical equipment, the protection of employee safety, the configuration of security facilities and fire-fighting equipment such as safety alarm devices.

Safety first, production second! To this end, based on the experience in organizing exhibitions for different vertical industries over 17 years, FE Exhibition creates the All IS<sup>+</sup>-Expo2020, a business event platform for one-stop marco-security solutions to adapt to the era of future dream factory from basic human-machine safety to production safety in automation and information and data security in industrial Internet, showcasing technologies and applications of one-stop solutions for IOT data security, information security, protection security, quality safety, fire safety, and enterprise safety.

The agglomeration effect brought by up to 7 concurrent theme exhibitions will benefit your company that can also enjoy the cross-border business feast. Look forward to your arrival at All IS<sup>+</sup>-Expo Shanghai 2020!
